Company Values

Calyx helps brands bring packaging to market with speed, confidence, and control.™

We work with companies that want to solve real-world problems, reduce complexity, and deliver value from concept through production.

Quality

Efficient packaging designed to meet industry-specific quality requirements.

Compliance

Efficient packaging meeting industry-specific compliance and regulatory needs.

Branding

Efficient packaging that is ideal for branding and marketing.

Sustainability

Efficient packaging designed to reduce environmental impact.

ca·lyx

Flowers and leaves typically bearing a part that encloses the point and base of another organ within a flower bud.

Calyx Brand Story

In nature, a calyx does not come in a "one size fits all" format. It organically calyxes, forming a unique structural shape tailored to the exact shape and needs of the flower it protects.

We apply this exact botanical blueprint to our pillow packaging.

For uncompromising brands, true distinction cannot be bought off the shelf. This was the promise we kept for your most valuable asset, built specifically around your unique position.

We built the physical and brand system from the ground up, so your brand commands the attention and reaps the performance that it deserves.

Packaging Solutions

PLASTIC SOLUTIONS

- Easy to Use Stand-up Pouches
- Customized Flat Bags
- Flow Wrap & Blow Film

Complete production and custom finished solutions

LABELS

- Standard Flat Labeling & Stickers
- Flexible Roll Labeling (RLL)
- Permanent Labels & Embossed Labels

Informational label application and advanced digital capabilities

WOODEN SOLUTIONS

- Proprietary Pallet Designs
- Custom Standard Wood Case Designs: Top Value
- Custom Palletizing Dependent Solutions

Customized solutions for product flow & storage

STEEL & METAL PAIL SOLUTIONS

- Standard Pail Labeling & Stickers
- Custom Pail Labels
- Custom Pail Design & Molding

100% food and chemical grade, high quality metal pails

GLASS

- Single Piece Technology
- Solenoid Systems
- Custom Glass Solutions

High quality and fully tested, high quality glass and glassware

07

Flexible Packaging

Flexible packaging solutions designed for performance, freshness, and customization.

STANDARD STAND UP POUCHES

Premium Finishes & Techniques

Advanced printing techniques and hand-applied finishes give every Calyx product identity, beauty, texture, and value. And every product is built directly into the surface.

Get to Know Us, Inside & Out

Premium Embellishments make the jar itself part of the product. Each jar is hand-applied with intricate, custom designs, complete with wiring.

Variable Data Printing (VDP) creates a signature of unique data, including individual jar colors, and labels, specific to each jar's data.

Security Features ensure your product will be protected from theft. Calyx jar features a dry, hot-melted design and tamper-evident seal.

Super Customization lets you create a unique, personalized jar, and label, perfect for individualized orders.

13

Rigid Packaging

Premium rigid packaging engineered for protection, compliance, and shelf appeal.

Calyx Cure

Ca

Calyx Cure

Cultivation Technology

Weight Retention, Terpene Retention, Boosted By Salivans.

Superior yields. More than 50% dry weight retention through cure, for heavier, more potent flower per batch.

90% maximum terpene retention when compared to curing bags.*

Ability to separate weight retention versus terpene retention.*

Sealing prevents the flow of air through holes through zippered openings.

*Based on average weight retention for 100L Calyx Cure and 100L Zippered bags.

Features

- 100L bag designed to maximize yield post-flowering process.
- Sealing and ventilation for optimal results.
- Reinforced bottom for extra weight support and durability.

100L Bag

Custom Cure

29

Custom Packaging Solutions

Packaging tailored to your product, process, and brand requirements.

Custom Packaging Solutions

Don't see what you're looking for? Good. That's where we do our best work.

Our product engineering team has spent a decade navigating the packaging industry and building the relationships that make unusual requests possible.

Custom formats, specialty materials, unique compliance requirements and high level customization are all possible.

If you can describe it we can make it.

31

Automation

Integrated automation solutions that improve efficiency and production consistency.

Built for Your Filling Line

Choosing packaging without thinking about your filling line is an expensive mistake. We've seen it enough times to know how to help. We know how to get packaging that works with your operations.

- Matching equipment
- Materials
- Packaging and filling
- Filling and capping
- Labeling
- Full system integration

Talk to your rep before you commit to a line or a container. It's a short conversation that saves a long headache.

COMPATIBLE WITH A RANGE

- Syring
- Vial
- Ampoule
- Bottle
- Tube
- Jar
- Overmolded

33

Let's Talk

Let's build something worth opening. If you have a product that needs packaging, or packaging that needs a better partner, start here. A call or a sample kit is all it takes.
